If a track record is set using a fuel other than that provided by RCQMA, the driver will be required to "back-up" the qualifying time in order for the record to stand. The fuel tank must be drained and refilled with RCQMA supplied fuel prior to the back-up qualifying attempt. The back-up time must be within one-tenth (0.100) of a second of the record time set during the original attempt for the record to stand.
